^ ^ ^ ^ ^

Write a program to create the above pattern on LEDs connected to LPC2148 port pins.

Port pins P0.x , P0.x+1, P0.x+2, P0.x+3, P0.x+4, where x is CB.EN.U4CSE194*x, the last digit of your roll number.

Compile the code and simulate the results in Proteus.

Clear any doubts ins the question during the initial 10 minutes.
